

AUTO FUSE MODULAR BASES (STAND ALONE OR GANGABLE)

Prolec

These modular bases can be used as stand-alone units or can be ganged together into 3 different configurations as illustrated on page 2. Each fuse base features blown fuse LED indication and 2 slots to store spare fuses. The fuse base also includes a 65 piece sticker set to identify each circuit. All bases include a clear cover. Customers can easily gang the units together by following the included instruction sheet.

Part Number	Description	W x L x H (mm) Dimensions
MFB6SC	6 Way Auto fuse panel, 30A screw terminals & cover	86 x 78 x 41
MFB12SC	12 Way Ground panel with screw terminals & cover	86 x 57 x 41

Voltage: 32V

Max. Cumulative Rating: 100A total.

Max. Terminal Rating: 30A (screw).

Output Terminals: M4 (5/32") screw.

Ground Terminals: M4 (5/32") screw.

Input & Ground Studs: M5 (3/16")

Base Colour: Black

Cover Colour: Clear

Screws & Lock Washers: Included with screw terminal bases.

MFB6SC & MFB12SC
Ganged together into
a single module
(fuses not included)

Included Sticker Set
(refer page 3)

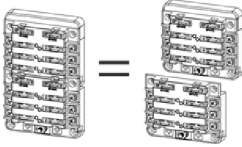

MFB12SC
12 Way Ground Base & Cover

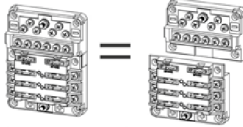

MFB6SC
6 Way Autofuse Base & Cover
(fuses not included)

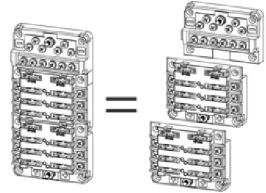

3 POSSIBLE COMBINATIONS

**12 Way Fuse Base
(No Ground terminals)**

**6 Way Fuse Base
(with 12 Ground terminals)**

**12 Way Fuse Base
(with 12 Ground terminals)**

Sample Combination: (1 x MFB6SC & 1 x MFB12SC)

Notes:

1. Bases can be joined together.
2. Fuse base includes a 2 piece clear cover.
3. Ground base includes 1 piece clear cover.
4. Sticker set is included with fuse base. No sticker set for ground base.
5. Instructions included with each unit for use & assembly.
6. LED indication of blown fuses.
7. Fuses are not included. We sell fuses to suit in all ratings.
8. When combining 2 x 6 way fuse bases to create a 12 way fuse base, the M5 power input stud will supply power to all 12 fuse positions (when assembled correctly using the included instructions).
